DETAILED ACTION

1. Claims 1-13, 15 and 16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on March 9, 2007.
2. Applicant's election with traverse of invention group II, claims 14 and 17, and the first compound recited in claim 17 as the elected species in the reply filed on March 9, 2007 is acknowledged. The traversal is on the ground(s) that both inventions are in the same class/subclass, and therefore the search of all the inventions are not a undue burden. This is not found persuasive because the search of group I is not required for the search of group II. Further, the search is not limited to patent literature.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting Rejections

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

Art Unit: 1617

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 14 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2 and 8-9 of U.S. Patent No. 7,196,106. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 2 and 8 in '106 are directed to compounds with the scope of the compounds defined in claim 14 herein and method of using the same for using the compound as therapeutical agents. Particularly, R1 and R2 are H, or C1-10 alkyl groups with substituent of R6 in claim 2. It would have been obvious to make a pharmaceutical composition comprising the compounds and a pharmaceutical acceptable carrier for the therapeutical method as claimed in '106.

Claim Rejections 35 U.S.C. 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 17 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Duffy et al. (US 7,196,102).

7. Duffy et al. teach the elected compound, tert-butyl 4-cyano-5[(2-ethylbutanoyl)amino]-3-methylthiophene-2-carboxylate. See preparative example 1, col. 26.
